

## **PUBLIC NOTICE**

**Norandal USA, Inc.** has applied to the Tennessee Division of Air Pollution Control (TDAPC) for a construction permit for approval to modify the allowable emission rate for existing emission source 24. This includes 4 casting lines (801 through 804) comprised of melting furnaces, holding furnaces, inline degassers, 13 annealing/homogenizing ovens, and a roller mill. These lines are similar to other casting lines at the facility. The proposed project will result in an increase in potential emissions of the criteria pollutant nitrogen oxide. No significant increment consumption would be expected. The project is subject to review under the state rule for Prevention of Significant Deterioration of Air Quality (PSD), Paragraph 1200-3-9-.01(4) of the Tennessee Air Pollution Control Regulations, Department of Environment and Conservation, which requires a public notification and 30-day public comment period. This project also constitutes a reopening for cause to add emission source 24 to their major source (Title V or Part 70) operating permit subject to the provisions of paragraph 1200-3-9-.02(11) of the Tennessee Air Pollution Control Regulations (also frequently referred to as Title V regulations) and also requires a public notice with a 30-day public comment period. A major source (Title V) operating permit is required by both the Federal Clean Air Act and the Tennessee Air Pollution Control Regulations. However, it should be noted that this facility has an existing Title V permit (548422).

EPA has agreed to treat this draft Part 70 permit modification as a proposed Part 70 permit modification and to perform its 45-day review provided by the law concurrently with the public notice period. Although EPA's 45-day review period will be performed concurrently with the public notice period, the deadline for submitting a citizen petition to object to the EPA Administrator will be determined as if EPA's 45-day review is performed after the public comment period has ended (i.e., sequentially).

The status regarding EPA's 45-day review of this project and the deadline for submitting a citizen petition can be found at the following website address:

<http://www.epa.gov/region4/air/permits/Tennessee.htm>

**The applicant is Norandal USA, Inc. with a site address of 400 Bill Brooks Drive, Huntingdon, TN 38344. They seek to obtain a construction permit (for existing emission source 09-0012-24/58897) to revise the NOx allowable emission limitations. This facility is considered a Secondary Aluminum Production Operation. The construction permit is needed for both the PSD and for modification of the Title V permit.**

The TDAPC has reviewed the application with respect to the above-mentioned PSD regulations. The TDAPC has made the determination that this modification can be approved if certain conditions are met. The revision to the Title V application used for this request have been deemed to complete. A copy of the PSD application materials used by the TDAPC, a copy of the preliminary PSD review, a copy of the draft/proposed Title V permit to reflect the revisions, and the draft construction permit are available for public inspection during normal business hours at the following locations:

**Carroll County Library**

Karen Pierce, Director  
625 High Street, Suite 102  
Huntingdon, TN 38344-3903

and

**Tennessee Department of Environment and Conservation**

Division of Air Pollution Control  
9th Floor, L & C Annex  
401 Church Street  
Nashville, TN 37243-1531

Also, if you require a copy of the draft/proposed permits they are available electronically by clicking the following link and unzipping the file:

<http://www.state.tn.us/environment/apc/ppo/norandal958879.zip>

Interested parties are invited to review these materials and comment on this modification. For comments to be considered, they must be written and addressed to **Mr. Barry R. Stephens, Director, Air Pollution Control Division, 9<sup>th</sup> Floor, L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531**. The written comments must be made within 30 days of this public notice. Questions concerning the source may be addressed to Mr. E. Flowers at the same address or by calling him at (615)-532-0609. A final determination on the PSD and reopening for cause will be made after weighing all relevant comments.

Individuals with disabilities who wish to review information maintained at the above-mentioned depositories should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such review. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12<sup>th</sup> Floor, 401 Church Street, Nashville, TN 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.
